

Water use increases with higher temperatures, lower precipitation and drought. Our consumption is down compared to last year, however we are not in the clear. Please continue to adhere to the Mandatory Restrictions, we are in this together!!

Please visit our website at www.cityofsafford.us for water conservation information and water saving tips.

1. Usage based on consumption reports; 2. Goal is 130 gallons per person per day; 3. National average of 100 gallons per person per day based on U.S. Geological Survey, Water Use Statistics
